At a time when most hospital and medical insurance plans are raising their rates, the Student Union hopes to announce an allotment plan next semester that will enable all students to participate. A total accident and coverage cost of $13.00, which includes both medical and hospital benefits, is available to all students, it has been possible to obtain a premium rate of $12.00, still retaining the same benefits.

$1,000 Protection
Here's what it covers: This college protection plan provides $1,000 accident insurance and $1,000 sickness benefits. Furthermore, your coverage can be increased. If you are interested in increasing your coverage, you can do so by applying for a separate additional policy. The annual premium for this additional coverage will be $10.00. The coverage will last for six months, regardless of whether you are in school, in the hospital, or not.

How do you pay? This year for the first time membership will be accepted on a monthly basis. A regular tuition invoice will include an automatic deduction for the plan. After you have examined your insurance program, you may find that you have adequate comparable medical and hospital protection. If so, you may waive the school policy by signing a card certifying to this fact. But be sure in mind that under the Drexel plan, accident coverage includes sickness benefits; and the hospitalization benefits for sickness cover hospital care and doctors' fees. Also, inclusion of

**Bowling Alley May Be Part of New Student Building**

A display presenting the proposed plans of Drexel's newest building, the Student Activities Center, is now placed in the court. Questionnaires are available at the display and over a number of points still not settled in the planning of the new building.

Of particular interest is the area set aside for bowling alleys. The expense of construction and maintenance of alleys will result in a large loss unless student use is frequent and steady over a period of years. It is felt that the bowling alleys will not have sufficient use, this area will be utilized for some form of repair service. The revenue from this service will help defray the cost of operating the building. An alternate use of this area would be to move the school store from its present location.

Another unsettled question is the arrangement and adequacy of the service area. The present plan provision may prove a disadvantage that will accommodate twice the number that can be served by the existing school cafeteria. The present service area will be open for student use after the opening of the new building.

The appointment of a special committee on research at Drexel Institute of Technology has been announced by Allen J. Matlorski, chairman of the Institute's board of trustees. The committee was organized because of the rapid increase in demand by industry and government for the solution of scientific, technical and managerial problems which require the wide variety of technical and research activities at Drexel until being called for the purpose of Director of Aeronautics and Space Research. The following scientists and engineers will remain available in the faculty of the Institute of Technology, according to Governor's recent reorganization of the National Aeronautics and Space Administration. The names of the scientists and engineers will remain available in the faculty of the Institute of Technology, according to Governor's recent reorganization of the National Aeronautics and Space Administration.

Trustee members of the committee are James H. Romuald, chairman; Henry T. Dey, president; Drexel University's president; Leslie R. Nesbitt, vice-president, and Vera White Collection have been strengthened by the group of old masters with such well-known artists as Fusca, Rambert, Matisse, and Henri Rousseau. Among the modern Japanese, special emphasis was placed on the work of Shiko Munakata, and through the generosity of Linsen J. Rosenwax, the museum now owns and displays copies of all of his woodcuts. The "Waves and Bodhisattva" series, which has directed the modern Japanese working more closely in the tradition of oriental art than the Japanese in Europe, Sekino, Araki, Takujiro, and Hiroshiyo, this recent acquisition, can be seen by hand to the back of the print, gives his work an unusually soft effect.

**The American School, strongly attracted to the Print Club Permanent Collection, includes the work of the more representative artists such as Vain, Vinc, Brint, Karpe, Lomasse, and Kusakul, Wenzler, Stoll, etc., and the work of European contemporary artists such as Antoine, Maurice, Hebbert, and Rapp. Among the artists whose works will be added to the collection in new pictures to their work in June are Paul Noelle, one of the most interesting of the moderns; and his severe illustrations to the poems of John Donne entitled "Ae Are Taps Too." The most recent acquisition, the display will not present increased size and boldness of color. The exhibition is rounded out with a small group of contemporary drawings.
The Pendulum Swings

by Howard Marphee

In this age of Big Business and Big Government, Big labor has taken its place. The present steel strike issue is not a simple one of a wage increase but goes much deeper. It goes to the control of working rules that govern a day's work. Many questions are being asked by the companies, such as: when a new piece of machinery is introduced should a labor union have the right to say that just as many men must be employed as before? Or why should workers be permitted to stand idly by and get paid for watching the machine operate? Also why should employees even be paid for work not done?

This practice is called "featherbedding." It is probably one of the reasons why the railroad unions have been so much trouble. Because the railroads have not been able to take advantage of mechanical improvements, their wage costs have risen. The basic issue comes down to the question whether the owners or managers of a business have the right to manage or whether a labor union shall dictate what is known as working rules. It is one of the fundamental issues which has caused the steel strike. It is a question of whether the laborers are important as the wages of labor for if they are not investors will shy away from a company and decline to lend it the funds it needs for expansion, thus in the long run preventing the creation of new jobs. Important as the wages of labor may be, it is only one half of the problem. A proper subject for bargaining but, in the final analysis, the employer must be the judge of the quality of the work done and the number of persons he will employ on each job.

The wages of capital are just as important as the wages of labor for if they are not investors will shy away from a company and decline to lend it the funds it needs for expansion, thus in the long run preventing the creation of new jobs. Important as the wages of labor may be, it is only one half of the problem. A proper subject for bargaining but, in the final analysis, the employer must be the judge of the quality of the work done and the number of persons he will employ on each job.

The right of the individual to work or to join or not to join a union is basic in the American democratic system. We must also uphold as inviolable the right of the employer to manage his property in behalf of those who have invested their savings in him. This is only right if we are to keep the free American enterprise system work.

The right of the individual to work or to join or not to join a union is basic in the American democratic system. We must also uphold as inviolable the right of the employer to manage his property in behalf of those who have invested their savings in him. This is only right if we are to keep the free American enterprise system work.

The initiative which enabled the American economic system to accomplish more than any other system on earth would then be stifled, and the results would be tragic. To bargain for better wages and working conditions is the right of a labor union. But in return the employers have the right to exercise an honest day's work for the wages paid, which isn't always the situation today. The length of the work week is a proper subject for bargaining but, in the final analysis, the employer must be the judge of the quality of the work done and the number of persons he will employ on each job.

The wages of capital are just as important as the wages of labor for if they are not investors will shy away from a company and decline to lend it the funds it needs for expansion, thus in the long run preventing the creation of new jobs. Important as the wages of labor may be, it is only one half of the problem. A proper subject for bargaining but, in the final analysis, the employer must be the judge of the quality of the work done and the number of persons he will employ on each job.

It is a well-known fact that Drexel is expanding on all frontiers. A change in the wind for Men's Student Council and Women's Student Government have been working hard in hand to see that just such a combined student government could become reality.

All of the ground work has been completed and only one thing is left, although it is by far the most important, step remains to be taken. This step is to have the newly proposed government's constitution accepted in a formal vote by the student body.

This is your chance to get in and help create something new at Drexel, which is widely seen as the major student council in the present time. Men's Student Council and Women's Student Government have been working hard in hand to see that just such a combined student government could become reality.

DIT Awarded Growth Study Grant

Drexel Institute of Technology has been awarded a grant of $20,000 by the Educational Facilities Laboratories, Inc., enabling the Institute to carry on a study of its physical growth during the coming academic year.

In making the announcement, Dr. James Crewe, Drexel's president, said the Institute set up a search for answers to the following questions:

How to provide academic building units suitable for highest economic use in construction and efficiency of academic use.

How to provide building units of a size suitable for highest economic use in construction and efficiency of academic use.

How to provide academic building units suitable for highest economic use in construction and efficiency of academic use.

WHHY Films Series For Later Showing

WHHY, the Philadelphia educational station, is devoting the summer months to the filming of special programs for showing on television by thirty-six educational institutions throughout the nation. The programs have been produced under contract to the National Educational Television and Radio Center.

3 New Series

In announcing the program, Richard R. Burdick, manager director of the station, said: "During the summer, we are in the unique position of a television station that has barely to be on the air. In addition to three new series for Center distribution, we are completing the filming and editing of a series with the Free Library of Philadelphia, plus four lectures with Eugene Ormandy. We are also cooperating with the Philadelphia Board of Public Education in presenting an annual workshop for television teachers." The most ambitious of the three new series which is scheduled for filming is "The Years of Woodwind," and features the renowned Philadelphia Woodwind Orchestra. The four programs in the series will trace the history and development of woodwind music and instruments over the past two centuries.

200 Featured

The other two series are in the area of children's programming. "Even More About Animals," will consist of ten programs produced in cooperation with the Philadelphia Zoological Garden, focusing biographical studies of animals, the public relations department of the zoo. The "No-No Hardware Store" series will feature Barbara Yanowski in its ten programs. Miss Yanowski was a part of the hit "Teaching Project" on WPIX, New York City, this past year.
DIT Student Body Visiting Bombsville During Summer

The TEKS headed down to Ocean City for an all-day Beach Party this summer. This was a popular place that was.

Brothers of Theta Chi and their dates got an informal picture at Mermaid Lake earlier this term.

Reminiscent of Spring Term, a service club pledge is chosen the proper way to light a cigarette for a bumper during summer term pledging.

Trading Problem On College Campuses—A Real Challenge

by Bill Scofield

The drinking problem on college campuses has been increasing in recent years as fast as the increase in their enrollments. The trend for young men and a surprising number of young women to frequent clubs featuring all-you-can-consume and plenty of loud noise seems to be directly connected with the carefree attitude of our day.

The many students who are just moderate social drinkers are not very concerned in the drinking question, but rather it is the heavy drinkers, those who drink “to get out of their minds” who are the problem. These men pull all kinds of wild hounds, many of which endanger both their own lives and the lives of others. Worst of all, many jeopardize the very purpose of college education, the acquiring of an education.

Why do these students carry their enjoyment to the sub degree? Tradition seems to be a major cause of big drinking. The night before final exams, the weekend before getting married, and the night after graduation are typical big blast occasions. However, here about the all too frequent last week-ends. The purpose in these seems to vary as much as the personalities of the individuals involved. Books, romance, and the need of something spectacular about which they can talk the following week are all leaders on the very long list.

It has been pointed out in many articles on the subject that problems cannot be buried with liquor.

Radio Station WMAX To Debut On Drexel Campus in September

Radio Station WMAX, a recent addition to the Drexel campus scene, will be making its formal introduction during the coming fall term. As most may or may not know, WMAX was in operation during the latter months of the past winter term. This period of broadcast proved to be of valuable experience to the staff of the organization. It showed that Drexel has been lacking a very important campus function—a radio station. It will prove, in the future, that a radio station a much greater scope of operation.

Preparations Made

During the past few months, many students have been giving time, help, and support. Some equipment has been bought and more equipment will be purchased before the end of the term and between terms so that it can be put into operation condition. Plans have been made for radio studios in the new Student Union Building and until then, temporary studios are nearing completion.

Program Schedule

WMAX hopes to present a lively and entertaining schedule this fall and all year around including broadcasting of sporting events, most all types and brands of music to suit every ear, interviews, discussions, lectures, and special shows presented by the British Broadcasting Company and the University of Pennsylvania.

All persons on the station staff hope that WMAX will be able to serve each individual taste and will certainly welcome any comments concerning programming. Also, anyone who is interested in working on the station staff can contact Dave Winfield for further information.

LOOKING 'EM OVER

By Migi Damiani

Summer is drawing to a close and we are anxiously looking to the future of WMAX's athletic program will move into full swing. The soccer team, chosen as America's #1 last year, has lost the services of All Americans Bob Meek, Dale Jethom, and Don Douglas through eligibility, but they are hoping to repeat their remarkable feat. Returning to the team are a number of lettermen led by Yennex, George Savelno, Larry Lee, and Stan Wybranski; middlefielder Austin Gleason; and Don Ritter and George Annett at fullback and goalie respectively.

Drexel's varsity football team, under the tutelage of Jack Hinkle, are looking forward to their first winning season in two years. New faces from freshman squad and transfer students Jim Valentine and Pete Gable from Navy and William and Mary respectively, are expected to help out considerably. This in the team so that now consists of head coach John Hinkle, backfield coach Don Hinkle, left (fullback coaches Horace Episcopo and Tom Olems.

This is the first coaching position for Shank on the collegiate level. The former, Norristown High and New York Lion student guard has coached the grid teams for the Past four seasons, are again making a last ditch bid for the pennant but everyone knows that it is too late. How­ever, the Yanks will be satisfied in that they will probably set all time records in attendance and at home and away.

The National League is much closer and a three-way battle for first place is now in full session. This writer predicts that they will finish the way: San Francisco, Milwaukee, and Los Angeles.

PRO FOOTBALL

Pittsburg Steelers are the probable winners of the Western Division, a team that is well named and the match should be close right down to the wire. This writer is giving the nod to TKK.

Theta Chi and Tau Epsilon Phi are the probable winners of their respective leagues in the IF Tennis. These same two teams met for the championship last year with Theta Chi emerging victorious. This year should be no time for the Oxmen to stop their winning ways.

MAJOR LEAGUES

Better defense and pitching should carry the Chicago White Sox to the American League pennant. Cleveland will find a close second with the Yankees finishing third. New York is currently making a last effort, but everyone knows that it is too late. However, the Yanks will be satisfied in that they will probably set all time records in attendance and at home and away.

Rainy weather had caused the postponement of many IF tennis matches over the past four seasons, are again paying the way that they are unbeaten in five contests thus far and are currently in the Blue League. Tau Epsilon Phi, who came in second last year, are again considered leaders in the Gold League. The Teks lost their entire tennis team through graduation but their present team has responded brilliantly and are presently undefeated. Alpha Pi Lamba and Tau Kappa Epsilon are in second and third places respectively in the Blue League. Each team has lost one match. The battle for the aggregate honors in the Gold League won't be decided until the end of the season.
