Science buildings dedicated to Deans Disque and Stratton

A $7,000,000 engineering-science complex was dedicated in honor of two Drexel benefactors, Friday, May 26, in formal ceremonies and a科学技术潮典. The former Science Building, which housed the Department of Electrical Engineering, was named Disque Hall in honor of the late Dr. Leon D. Disque, former dean emeritus of students, who served at Drexel from 1943 until his retirement in 1962.

Another section of the new complex will be constructed on the east side of the Science buildings dedicated twenty years ago. The ceremony will conclude with the Drexel "Ode," the benefit song written by Mr. Webb, followed by the address of T. E. Hagerty will confer the honor degrees and the address of the Distinguished American Award to Dwight D. Eisenhower. The evening will also include a reception for the Drexel faculty and alumni.

The Distinguished American award is given in recognition of world peace and the promotion of international goodwill. According to Markowich, the purpose of the Distinguished American Award Program is to "recognize and to meet the great men of our time. Future recipients will be asked to accept the award at Drexel and address a gathering of TEP administrators, faculty and students on topics of their choice." The chapter brotherhood is pleased to give its President the honorary membership award. For his contributions to the advancement of higher education and for his efforts and states in the search for world peace and the promotion of international goodwill," according to Markowich.

The ceremony will conclude with the call to the Drexel "Ode," the benedictory song written by Mr. Webb, followed by the address of Dr. William W. Hagerty, Drexel president, noted that the new building complex will be completed in September, and is designed to meet the educational and research needs of the future.

According to the advice of his physician, General Eisenhower was unable to accept the award in person. The ceremony was "a Drexel faculty member, Edward J. Nesbitt, chairman of Drexel's Board of Trustees, presided at the dedication ceremonies."
Residual members discuss future of Program Board

The alleged disintegration of the Student Program Board since it was transformed into autonomous committees caused President David Bell to call a meeting of the residual members. Dean Eichhorn was asked to attend the meeting to answer questions pertaining to the future of the SPB.

Formerly the social, cultural, travel and film committees were coordinated under an executive committee which formed the link between the SPB and the DAC. Residual members discussed that "we can't program efficiently now." Dean Eichhorn promised to meet with the members again next week and suggest possible solutions after checking with the dean's office.

Dean Eichhorn agreed that participation in student programming should provide the members with a learning opportunity, noting that there must be a trained person in charge who is more of a coordinator than a faculty advisor. "With the advisor and the students should work together step-by-step; it should be a cooperative venture," Dean Eichhorn continued. "But the programming director has the final say."

Currently the Dean of Men's office is looking for a new programming director to take over after Mrs. Bovill's departure in the fall. Dean Eichhorn feels this person should "be valuable to everyone who seeks advice, including fraternities and other organizations."

An Original Musical Comedy

By Norm Smith

Well, it's happened again, only two weeks into the term and finals are only five days away. Since it is too late to study, here are a few of the springform wrap-up activities. This afternoon from 1:30 p.m. to 130 p.m. the ex-SPB is sponsoring a FREE WATER ICE social on the lower west terrace of the DAC. To add to the general excitement of the event, Moore College's all girl Motel Clark Jug Band will perform...Tonight's FRIDAY NITE FLICKER is "The Perfect Furlough," starring Tony Curtis and Janet Leigh. The feature will begin at 7:35 in the Business Administration Auditorium.

This is also the last day to vote on the REFERENDUM for a new student government, be different for a change and take the time to vote; bring your matriculation card.

The Christian Science Monitor is NOW ON SALE in the DAC.

Dean of Faculty retires after 34 years at Drexel

Dr. Kenneth G. Matheson, dean of faculty since 1964, to retire after 34 years at Drexel. He was dean of the Bus Ad College from 1950 to 1964. Dr. Matheson's father was Dr. James G. Matheson, the first man to receive the M.D. degree given by Lincoln Medical College and who served in the U.S. Civil War.

Government vote has poor turnout for three days

A disappointing total of only 801 students has voted in the first three days of this week's student government all-campus referendum. The voting machines will be set up in the Great Court and the basement of the DAC today from 11 a.m. until 2:30 p.m.

The combined efforts of the Student Senate and the Student Government Reorganization Committee have failed to inspire more than a small percentage of the student body in the proposed new government structure and the other issues comprising the first student referendum in Drexel's history.

The Student Senate Election Committee has also announced that the upcoming elections for college officers in the fall will also be conducted for one week during summer term. The combination of those students voting this week and those voting during the summer, they feel, should accurately reflect and represent the opinions of all of Drexel's students.

Education of voters against Vietnam war is objective of 'Vietnam Summer' campaign

This summer will be "Vietnam Summer," various groups in the Drexel community announce. They are organizing a project to be patterned after the "Civil Rights Summer." Various groups in the Cambridge, Mass. area are organizing a project to be patterned after the "Vietnam Summer." Various groups in the Cambridge, Mass. area are organizing a project to be patterned after the "Vietnam Summer."

Senior Hum & Tech accepted by Penn State medical school

Toby Brown, Humanities and Technology 1967, has been accepted as a member of the pioneer class of the Milton S. Hershey Medical Center, Pennsylvania State University College of Medicine.

Toby Brown is one of a group of 48 seniors chosen from over 1100 applications. Mr. Brown was one of 130 applicants asked to appear for the three hour interviews conducted to choose the class of 40 medical students.

The ultimate purpose of the Vietnam Summer is to affect the national political scene in the fall of 1969. As noted in the pamphlet, "We aim at more than changing a vote or two in Congress. We seek to defeat Lyndon Johnson and his war."

Those students interested in helping to educate and organize the American people against the Vietnam War, are asked to contact the Vietnam Summer Committee, 1207 Ada, S. Charles St., Baltimore, Md. 21217, or to call 317-495-2700.

INTERESTED IN AN OUTSTANDING LECTURE SERIES?

Well, let's do something about it!

THERE WILL BE A D.A.C. LECTURE COMMITTEE PLANNING MEETING FOR ALL INTERESTED PERSONS REGISTRATION DAY, JUNE 26, IN ROOM 216. THIS WILL BE AN ALL-DAY MEETING, 10 A.M. TO 5 P.M. — COME IN WHEN YOU CAN, LEAVE WHEN YOU LIKE.

WE NEED PEOPLE WHO HAVE IDEAS TO CONTRIBUTE AND THE ENERGY TO CARRY THEM OUT. IF YOU'RE INTERESTED IN PLANNING SUCH A SERIES, PUBLICIZING IT, OBTAINING SPEAKERS, ETC., BRING YOUR IDEAS AND YOUR FRIENDS TO ROOM 216, REGISTRATION DAY.
The Department of Economics, the Graduate Studies Committee of the College of Business Administration, and the faculty of the College of Business Administration have approved a graduate program in economics. The program, which when completed will verify an MA degree in economics, is expected to be introduced in September of this year.

CBA plans MA degree in economics

As well as satisfying the general conditions for admission to a graduate study program, prerequisites will include mathematics (above B 001 and B 002), Intermediate Microeconomics and Intermediate Macroeconomics.

The Master's program presented is intended to provide a flexible format for transition to a Ph.D. program, hopefully within two or three years.

In preparation for the introduction of this program, according to Dr. Russell U. McLaughlin, professor of economics, the faculty has been enlarged, and the undergraduate program expanded and strengthened.

As it presently stands, the approval of the Institute Faculty, the Board of Trustees, and the State is needed before the Master's program can be formally implemented or grant any degrees.

TEP highest scholastically

Academic standings of the twelve fraternities and five sororities on campus have been released. Tau Epsilon Phi placed first with a 2.7550 over-all average. Sigma Alpha Mu was second with a 2.6572 total average, Beta Nu third with a 2.6153 and Delta Sigma Phi fourth with 2.5722.

An Expression of Concern

In accord with the spirit of Drexel's 75th Anniversary which was dedicated to the "responsible man in a free society," we, the undersigned faculty and students, join in expressing our deep concern over the expanding war in Vietnam and the diminishing hope of a peaceful settlement. We endorse the view of Senator Church that:

"The catastrophe of a limitless war in Asia must be fully assessed, while there is still time. It could only bring unprecedented suffering and sorrow — a blood bath without equal in human history. With the stakes mortally high, we must not permit the stifling of dissent in the United States. We must not fall silent out of timidity or despair, whatever the political retribution. The debate must go on."

(New York Times, May 18, 1967, p. 2)

We urge our government to take greater initiative in seeking a new and moral alternative to our evolved policy of bringing about negotiations by force and to seek alternatives to the devastation of all-out war. We deplore the hardening of attitudes toward the inevitability of war. It is not too late to change our attitudes and objectives now to break the impasse and find an honorable peace. We believe that speaking out in this way is in accord with our patriotic duty as "responsible men in a free society."

If you are interested in promoting further discussion at Drexel on this vital national issue, contact Professor E. Nichols, Department of Mathematics (ext. 554) or Paul Fenske, Room 208, DAC (ext. 527).
The freedom to dissent

Dissent is almost endemic to America - the great nation born of dissent and dissatisfaction; the nation that emerged from the dissent called the American Revolution. Such attacks are being directed, for example, against Sen. Fulbright, 'Morse and Church for speaking out against this nation's foreign and domestic policy.

America was founded upon the ideals of democracy and the great world power, the nation whose political structure (the two-party system) and moral fibers (with all ideologies permitted public expression) daily acknowledge the necessity of dissent.

Yet it is in America that reaction to criticism is breeding a re-vitalization of "Red-baiting" and other anti-intellectual attacks. Such attacks are being directed, for example, against Sen. Fulbright, Morse and Church for speaking out against this nation's foreign and domestic policy.

America is the world's first experiment in political democracy. This country was the first established upon a firm, written foundation of political equality. Those who act in the name of employers' or school authorities to deny to some their shares of democracy, are actually subverting this foundation.

When suppression is condoned - under any circumstances - democracy is first adjudicated, then destroyed. It then becomes obvious to the world that the Great Experiment has failed, that true democracy cannot and will not work.

If differences of opinion are not permitted to surface, then we are truly succumbing to arrogance. But Sen. Fulbright is right - it is possible to correct: this is not the "arrogance of power," for there is no power in those who only reit to criticize is a desperate attempt to silence the critics. By conceding, we withdraw our support to an arrogance engineered, rather, by insecurity.

And when we are cowed by accusations of disloyalty, we invalidate our right to think ourselves "free men," and certainly to think ourselves "reasonable men."

"The age of nations is past. The task before us now, if we would perish, is to build the earth." - Teilhard de Chardin

I read these words often, and every time I do, I feel a profound sense of the need for my generation to understand that the world of tomorrow is in our hands, and that we must tread the path of reason, for in the words of Teilhard de Chardin, "We must survive.

It has been said that we are at war with one another. This is an illusion, this is a partial positive contribution. This is from every college student who gives his own life with his own values -- making decisions without being forced into them.

I believe that the future of the American profession has apparently decided that generation is expendable. It's going as well. And every one of

The Egyptian-Israeli conflict is a rather pleasant dilemma for the American diplomat. It may be unsolvable within the U.S. framework, with the considerations with regard to the position and the Arab-Israeli conflict, and its oil supply. Of course, I believe that it will be certain that the United States and the Arab nations will not be a factor in any future Middle East conflict.

One must consider the influence, and it might be described as the situation as a holy war with Israel and Syria. Christians, as God and Jesus Christ, as the image of the nation, and the cross on which Nazarī was crucified, is the image of that generation is expendable. It's going as well. And every one of

America is the world's first experiment in political democracy. This country was the first established upon a firm, written foundation of political equality. Those who act in the name of employers' or school authorities to deny to some their shares of democracy, are actually subverting this foundation.

The law will be rekindled with patriotic ideals. It will give us the opportunity to put aside my life and serve the country; to fight for the democratic way of life, freedom and self-determination for everyone -- everyone except me. And if there is

One hundred years ago, people were fighting for their country. People who were fighting to kill before I am allowed to build the world.

The draft spells death for my ideals. The draft implies that my education is in the hands of the federal government, and that I am to care for my political career.

If differences of opinion are not permitted to surface, then we are truly succumbing to arrogance. But Sen. Fulbright is right, it is possible to correct; this is not the "arrogance of power," for there is no power in those who only reit to criticize is a desperate attempt to silence the critics. By conceding, we withdraw our support to an arrogance engineered, rather, by insecurity.

And when we are cowed by accusations of disloyalty, we invalidate our right to think ourselves "free men," and certainly to think ourselves "reasonable men."
It rained at the speedway

By Richal Lampor

It's raining in Indianapolis, so they've turned on the red lights to stop the race. Parkeil Jones coasted in and now Parnelli Jones coasted in, too. There was no further action, however, and the race was declared over. The rain had come to the rescue.

One hundred and five Americans die in Vietnam, which means 100,000 Vietnamese die in the middle of the night. There are a lot of kids who will never realize that they once had a father, and a lot of mothers who will never realize that they once had a son. The problem is, the kids will die in 10 years and the mothers will die in 20 years.

Three years equal nothing. It all adds up to a lot of lives, but they will never be the same, and I'm wondering what benefits we have to bear for three years of war, because all I see is a breakdown of everything I thought this country was supposed to be.

We've never fought in a war like this one, so you can't blame people who ask questions and expect answers. Those people deserve answers, too. They don't deserve the kind of abuse they've received from those who would rather have a few more of these than we could possibly imagine.

Editor, Drexel Triangle:

On Friday last, May 26, I noted as article by Hallie Shaft in which she commented somewhat unfavorably on the food service provided in the Dragon's Den located in the Antillaus Center. Although I am not a student here, I feel compelled to come to the defense of the University food service not only because of what I feel was an unwarranted attack on it but because I may have a source of comparison that Miss Shaft does not have.

Besides working for a firm that does business on this campus, I also attend another university in the city. I have found that not only is the Drexel food service better than my university's, but all of the places I could stop to eat in and around the city I chose to eat at Drexel.

In specific reply to Miss Shaft's accusations I can only say that the university does get daily deliveries of bread and the Coke distributors are adjusted by experts from Coca-Cola who, I'm sure, are not cutting the syrup ratio.

James F. Hoburg
EE '69

Huh?

Editor, Drexel Triangle:

Being an average Drexel student, I don't read The Triangle very often. However, the other day as I was wrapping the garbage I noticed that my name was signed to a letter concerning the current Tasmanian problem. Needless to say as a normal Drexel student I could almost give a damn about something as unimportant as the extermination of 200 people, and the letter was not mine. After some research, I found that my name was signed to some other letters.

VIETNAM SUMMER

AN EXERCISE IN PRACTICAL DEMOCRACY

The Vietnam Summer Project is a concerted national effort to reach out to the now silent Americans who are growing more and more worried about the Administration's war in Vietnam.

VIETNAM SUMMER WILL BE thousands of people in neighborhoods all across the country stimulating discussion, educating and action.

VIETNAM SUMMER WILL INVOLVE students, workers, professionals, the poor and the middle class.

VIETNAM SUMMER WILL ORGANIZE petition drives, grass-roots congressional hearings, draft resistance, and referenda on the war.

VIETNAM SUMMER WILL BUILD a movement to release the voice of the American people.

IT MAY HELP bring peace to the people of Vietnam.
Blue Key elects officers, installs new members

Blue Key, the national men's honorary leadership fraternity, elected officers for the coming year at their May 10 meeting. Officers are elected by the graduating senior members.

Norman Smith, a pre-junior and former president of the Student Program Board, was elected president. The new vice-president is Tony Pierantzi; a junior and this year's Spring Prom chairman. He Curtis, junior class president, was elected treasurer and Tom McClosky, a junior and the Editor-in-Chief of The Triangle, is secretary.

Smith stated that as president he would spend the year attempting to improve the student-administration relationship. "Since Blue Key members constitute the leaders of Drexel's major organizations, this is the best use for the fraternity. By having informal socials, with major administrative officers of Drexel including the Board of Trustees, both the student leaders and the administration could have a better understanding of what each is attempting to accomplish."

Smith noted that Dean Eichhorn recently invited the Blue Key members to a barbecue at his home. "Many of the members, including myself, look to Dean Eichhorn now as a friend and find it much easier to communicate with him," stated Smith, "and I hope that other such relationships can develop in the coming year as a result of the program."
